**Data Abstraction and Problem Solving with C++** Frank M. Carrano, Paul Helman, Robert Veroff, 1998 Focusing on data abstraction and data structures the second edition of this very successful book continues to emphasize the needs of both the instructor and the student The book illustrates the role of classes and abstract data types ADTs in the problem solving process as the foundation for an object oriented approach Throughout the next the distinction between specification and implementation is continually stressed The text covers major applications of ADTs such as searching a flight map and performing an event driven simulation It also offers early extensive coverage of recursion and uses this technique in many examples and exercises Overall the lucid writing style widespread use of examples and flexible coverage of material have helped make this a leading book in the field Book Jacket

**Data Abstraction and Problem Solving with C++** Frank M. Carrano, 1995 This work provides novice and professional programmers with a bridge from traditional programming methods to the object oriented techniques available in C It clearly explains encapsulation and C classes which are then used throughout to implement abstract data types such as lists stacks queues trees and tables Inheritance polymorphism templates and operator overloading are explained both conceptually and through examples The work offers early extensive coverage of recursion and uses the technique through many examples and exercises It sets out to provide a firm foundation in data abstraction emphasizing the distinction between specification and implementation

**C++** Larry R. Nyhoff, 1999 Emphasizing abstract data types ADTs throughout this work covers the containers and algorithms from the Standard Template Library introducing the most up to date and powerful tools in C

*Data Structures and Problem Solving Using C++* Mark Allen Weiss,2000 Experienced author and teacher Mark Allen Weiss now brings his expertise to the CS2 course with Algorithms Data Structures and Problem Solving with C which introduces both data structures and algorithm design from the viewpoint of abstract thinking and problem solving The author chooses C as the language of implementation but the emphasis of the book itself remains on uniformly accepted CS2 topics such as pointers data structures algorithm analysis and increasingly complex programming projects Algorithms Data Structures and Problem Solving with C is the first CS2 textbook to clearly separate the interface and implementation of data structures The interface and running time of data structures are presented first and students have the opportunity to use the data structures in a host of practical examples before being introduced to the implementations This unique approach enhances the students ability to think abstractly

*Data Structures and Algorithm Analysis in C* Mark Allen Weiss,1993 From a prominent expert in algorithm efficiency this book discusses the use of modern data structures with a keen eye for issues of performance and running time Abundant examples demonstrate the power and breadth of the C language in the hands of an experienced C programmer The concepts behind data structures are illustrated with many diagrams and illustrations

*Data Abstraction & Problem Solving with C++* Frank M. Carrano,2007 The classic best selling Data Abstraction and Problem Solving with C Walls and Mirrors book provides a firm foundation in data abstraction that emphasizes the distinction between specifications and implementation as the basis for an object oriented approach This new edition offers the latest C features and an introduction to using Doxygen a documentation generator for C enhanced coverage of Software Engineering concepts and additional UML diagrams Frank's Making it Real blog <http://frank.m.carrano.com/blog> extends his textbooks and lectures to a lively discussion with instructors and students about teaching and learning computer science Follow Frank on Twitter [http://twitter.com/Frank\\_M\\_Carrano](http://twitter.com/Frank_M_Carrano) Find him on Facebook <https://www.facebook.com/makingitreal>

*Objects, Abstraction, Data Structures and Design* Elliot B. Koffman,Paul A. T. Wolfgang,2005-10-20 It is a practical book with emphasis on real problems the programmers encounter daily Dr Tim H Lin California State Polytechnic University Pomona My overall impressions of this book are excellent This book emphasizes the three areas I want advanced C data structures and the STL and is much stronger in these areas than other competing books Al Verbanec Pennsylvania State University Think Then Code When it comes to writing code preparation is crucial to success Before you can begin writing successful code you need to first work through your options and analyze the expected performance of your design That's why Elliot Koffman and Paul Wolfgang's Objects Abstraction Data Structures and Design Using C encourages you to Think Then Code to help you make good decisions in those critical first steps in the software design process The text helps you thoroughly understand basic data structures and algorithms as well as essential design skills and principles Approximately 20 case studies show you how to apply those skills and principles to real world problems Along the way you'll gain an understanding of why different data structures are needed the applications they are suited for and the advantages and disadvantages of their possible implementations Key Features Object oriented approach Data structures are presented in the context of software design principles 20 case studies reinforce good programming practice Problem solving methodology used throughout Think then code Emphasis on the C Standard Library Effective pedagogy

**Data Abstraction & Problem Solving with C++** Frank M. Carrano, Timothy Henry, 2017 For courses in C Data Structures Concepts of Data Structures and Abstraction for C Programmers The 7th Edition of Data Abstraction Problem Solving with C Walls and Mirrors introduces fundamental computer science concepts related to the study of data structures The text explores problem solving and the efficient access and manipulation of data and is intended for students who already have a basic understanding of programming preferably in C The walls and mirrors mentioned in the title represent problem solving techniques that appear throughout the text Data abstraction hides the details of a module from the rest of the program whereas recursion is a repetitive technique that solves a problem by solving smaller versions of the same problems much as images in facing mirrors grow smaller with each reflection Along with general changes to improve clarity and correctness this edition features new notes programming tips examples and programming problems as well as C 11 and C 14 features including safe memory management using smart pointers and safe and secure coding techniques
