Aczel, 2014-04-15 The renowned science writer mathematician and bestselling author of Fermat's Last Theorem masterfully refutes the overreaching claims the New Atheists providing millions of educated believers with a clear engaging explanation of what science really says how there's still much space for the Divine in the universe and why faith in both God and empirical science are not mutually exclusive A highly publicized coterie of scientists and thinkers including Richard Dawkins the late Christopher Hitchens and Lawrence Krauss have vehemently contended that breakthroughs in modern science have disproven the existence of God asserting that we must accept that the creation of the universe came out of nothing that religion is evil that evolution fully explains the dazzling complexity of life and more In this much needed book science journalist Amir Aczel profoundly disagrees and conclusively demonstrates that science has not as yet provided any definitive proof refuting the existence of God Why Science Does Not Disprove God is his brilliant and incisive analyses of the theories and findings of such titans as Albert Einstein Roger Penrose Alan Guth and Charles Darwin all of whose major breakthroughs leave open the possibility and even the strong likelihood of a Creator Bolstering his argument Aczel lucidly discourses on arcane aspects of physics to reveal how quantum theory the anthropic principle the fine tuned dance of protons and quarks the existence of anti matter and the theory of parallel universes also fail to disprove God

God & Golem, Inc. Norbert Wiener, 1966-03-15 The new and rapidly growing field of communication sciences owes as much to Norbert Wiener as to any one man He coined the word for it cybernetics In God and the method of its learning was no different in principle from that of the human being who learns to play checkers A second point concerns machines which have the capacity to reproduce themselves It is our commonly held belief that God made man in his own image The propagation of the race may also be interpreted as a function in which one living being makes another in its own image But the author demonstrates that man has made machines which are very well able to make other machines in their own image and these machine images are not merely pictorial representations but operative images Can we then say God is to Golem as man is to Machines in Jewish legend golem is an embryo Adam shapeless and not fully created hence a monster an automation The third point considered is that of the relation between man and machine The concern here is ethical render unto man the things which are man's and unto the computer the things which are the computer's warns the author In this section of the book Dr Wiener considers systems involving elements of man and machine The book is written for the intellectually alert public and does not involve any highly technical knowledge It is based on lectures given at Yale at the Soci t Philosophique de Royaumont and elsewhere
